

# Digital evolution: Porsche Advanced Cockpit and new PCM

With this new generation, the Cayenne is writing a new chapter in the relationship between driver and vehicle: The Porsche Advanced Cockpit is fully integrated into the sporty, luxurious atmosphere. At the heart of the new display and control concept from Porsche is the 12.3-inch full-HD touchscreen from the latest generation of Porsche Communication Management (PCM), launched last year with the new Panamera. A range of digital functions can be operated intuitively – including by voice control. The standard Porsche Connect Plus allows access to online services and the Internet. This includes the standard online navigation with real-time traffic information. The analogue controls on the new centre console are focused on the main functions of the vehicle. Other buttons are harmoniously integrated into the smartphone-like, glass-look touch surface, giving acoustic and haptic feedback when operated. In typical Porsche style, the driver has a central analogue tachometer to view. This is flanked by two 7-inch full-HD displays, which display all other relevant driving data plus additional information selected using the multi-function steering wheel. Night Vision Assist with a thermal imaging camera is one of the most important assistance systems, along with Lane Change Assist, Lane Keeping Assist including traffic sign recognition, traffic jam assist, ParkAssist including Surround View and Porsche InnoDrive including adaptive cruise control.
