

Your personal Cayenne – more customisation, more online services

At the same time, the new PCM brings the next level of customisation. It is not only the start screen and main menu that can be adjusted to the driver's needs. Up to six individual profiles can also be configured. As well as a large number of interior settings, a profile is used to store specifications for lights, driving programmes and assistance systems. Depending on the equipment, the driver can also apply their own settings to the new sound systems from Bose® and Burmester®. Plus, the new Cayenne is always online if the driver needs it to be – the expanded Connect Plus services are available through the integrated LTE-enabled SIM card. The engine-independent heating, for example, can be programmed remotely via smartphone. In addition, the Offroad Precision App, specially developed for the Porsche Cayenne, is now also available as part of the new standard package. It allows rough-terrain drives to be documented in detail, helping the driver to improve their own skills using video recordings.
